Tax Summary Guide

This guide provides a general reference for the Tax Summary report to the ATO tax return labels for individuals, trusts, self-managed super funds and companies.

Please note this guide provides general information only and is not intended to represent taxation, investment or professional advice. Should you require additional assistance, consult a registered tax advisor.

Clients who want CGT losses from prior years included on the Tax Summary report will need to manually record those losses in the portfolio. If you have been a non-resident for tax purposes or you hold additional assets which are not part of this reported portfolio, we strongly recommend you seek further tax advice.

In addition, if you have any further questions in relation to your client's tax return, the general information presented in this guide or the reference to the ATO labels, you should seek professional tax advice.

The main sections in the report to use when preparing your tax return is the Tax Summary for individuals, trusts and self-managed super funds. Company investors should use the InvestSMART Tax Guide for Accountants.

The additional information in the Report can be used to provide more detail on your income and gains if there is disagreement with the ATO or if required by your taxation adviser.

Individual Tax Returns

For investments in 2 or more names, the totals on the summary page must be divided by the number of investors for each individual's tax return.

If you use the myGOV online tax application to complete your tax return, some information will automatically be included in your return, under existing ATO tax data collection processes. You will need to manually add any realised capital gains less any realised capital losses and manually deduct management fees (shown as other deductions on the Tax Summary page).

Below is a screenshot of a myGov page. Interest income, dividends, foreign income and managed fund distributions should be pre-populated from information provided by the share registries.

Deductions

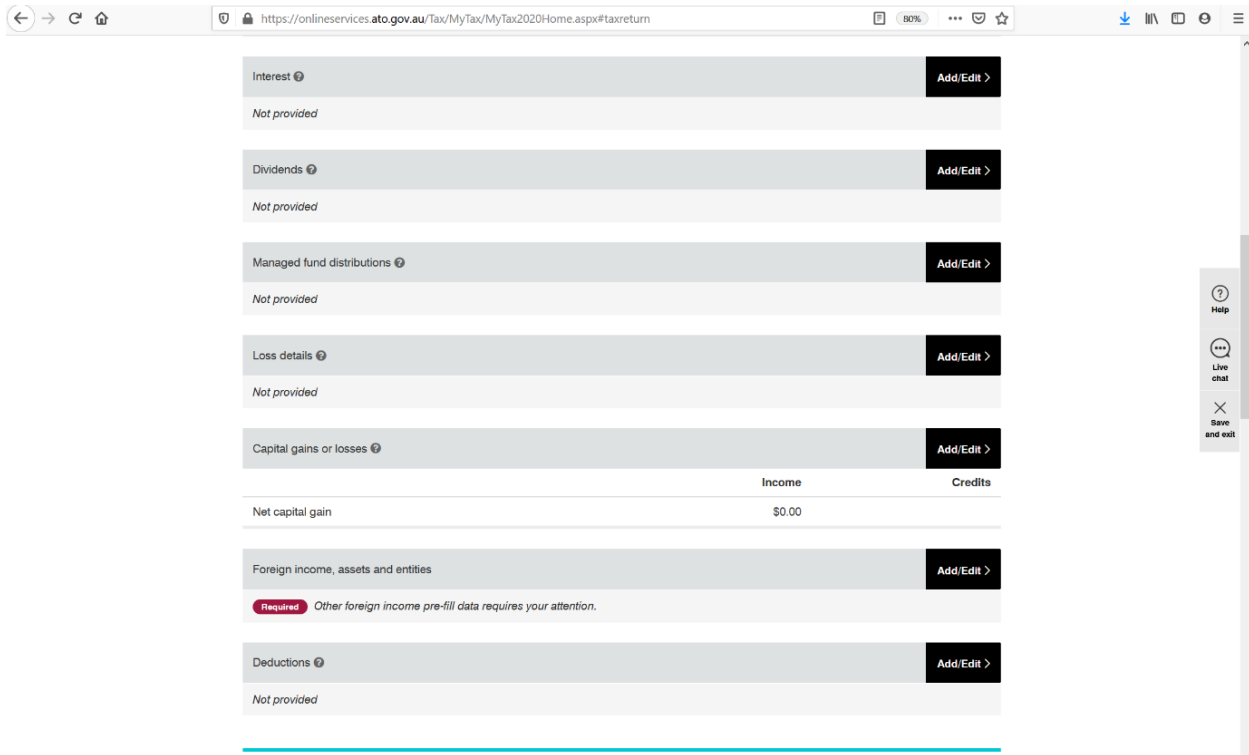

Individuals, SMSFs and companies can claim the management expenses and other costs shown as other deductions against any assessable income. If you use the myGov online portal, these will not be automatically pre-populated on your return – you must manually enter these.

For SMSFs and companies, your tax adviser should deduct these from your assessable income.

Brokerage

Brokerage costs have been included in the cost base of any assets you hold and are included in calculating any realised capital gains or losses.
