

Target Market Determination – InvestSMART Professionally Managed Accounts

Legal disclaimer

This Target Market Determination (TMD) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). It sets out the class of consumers for whom the product, including its key attributes, would likely be consistent with their likely objectives, financial situation and needs. In addition, the TMD outlines the triggers to review the target market and certain other information. It forms part of InvestSMART Fund Management Ltd.'s design and distribution arrangements for the product.

This document is **not** a product disclosure statement and is **not** a summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the Product Disclosure Statement, including the Investment Menu for the InvestSMART Professionally Managed Accounts before making a decision whether to invest through this product.

Important terms used in this TMD are defined in the TMD Definitions which supplement this document. Capitalised terms have the meaning given to them in the product's PDS, unless otherwise defined. The PDS can be obtained by downloading a copy from the www.investsmart.com.au/invest-with-us.

Target Market Summary

This product is likely to be appropriate for an investor seeking a very low risk and return as given by cash and cash like investments, to be used as a satellite holding within a portfolio where the consumer has a very short-term investment timeframe, very low risk/return profile and needs immediate access to capital.

This product is not suitable for investors seeking a high return or who have a medium to long term investment horizon.

Fund and Issuer identifiers

Issuer	InvestSMART Funds Management Limited	Model	Cash Portfolio
Issuer ABN	62 067 751 759	Date TMD approved	30 September 2021
Issuer AFSL	246441	TMD Version	1.0
ARSN	620 030 382	TMD status	<i>current</i>

Description of Target Market

This part is required under section 994B(5)(b) of the Act.

TMD indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

In target market	Potentially in target market	Not considered in target market
------------------	------------------------------	---------------------------------

Instructions

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a customer meeting the attribute in column 1 is likely to be in the target market for this product.

Generally, a consumer is unlikely to be in the target market for the product if:

- **one or more** of their Consumer Attributes correspond to a **red** rating, or
- **three or more** of their Consumer Attributes correspond to an **amber** rating.

Definitions of terms are in the attachment or otherwise in the PDS.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product or managed account as part of a diversified portfolio (typically with an intended product use of *satellite/small allocation* or *core component*). In such circumstances, the product or managed account should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a conservative portfolio with a satellite/small allocation to growth assets. In this case, it may be likely that a product or managed account with a *High* or *Very High* risk/return profile is consistent with the consumer's objectives for that allocation notwithstanding that the risk/return profile of the consumer as a whole is *Low* or *Medium*. In making this assessment, distributors should consider all features of a product (including its key attributes).

Consumer's investment objective	TMD Indicator for product	Product description including key attributes
Capital Growth		<p>Investment objective InvestSMART Professionally Managed Cash Portfolio seeks to track the average return of the RBA Cash Rate, before taking into account fees, expenses and tax.</p> <p>Portfolio overview The Portfolio provides low-cost access to a small range of cash tracking ETFs. The Cash Portfolio is designed for investors seeking a 100% weighting to Australian cash.</p>
Capital Preservation		
Capital Guaranteed		
Income Distribution		

Consumer's intended product use (% of Investable Assets)	TMD Indicator for product	Product description including key attributes
Solution/Standalone (75-100%)		The Portfolio is likely to be suitable as a satellite allocation in an investor's portfolio. The Portfolio has diversification across asset classes with different ETF providers
Core Component (25-75%)		
Satellite/small allocation (<25%)		
Consumer's investment timeframe	TMD Indicator for product	Product description including key attributes
Short (≤ 2 years)		The minimum suggested timeframe for holding investments in the Portfolio is 1+ years and may also be suitable for long term investors who want low risk and lower returns.
Medium (> 2 years)		
Long (> 8 years)		
Consumer's Risk (ability to bear loss) and Return profile	TMD Indicator for product	Product description including key attributes
Low		The Portfolio has a Low - Medium risk profile with an expected loss in 0 years out of every 20 years.
Medium		
High		
Very High		
Consumer's need to withdraw money	TMD Indicator for product	Product description including key attributes
Daily		The product is very liquid as invests in liquid, high quality ETFs, as well as cash and cash equivalent assets that are readily realisable. Investors will normally be able to redeem the Portfolio on any Business Day, with redemption proceeds available on T+3.
Weekly		
Monthly		
Quarterly		
Annually or longer		

Consumer's Other requirements	TMD Indicator for product	Product description including key attributes
Individual tax management of investments		The product provides individual tax management of the investments
Visibility / transparency of portfolio holdings		The portfolio holdings are disclosed immediately
Ability to customise portfolio or accommodate other holdings		The product is not customisable.
Ability to include <i>in specie</i> transfer of existing investments		The investor can <i>in specie</i> holdings out of the account at any time.

Appropriateness

Note: This section is required under RG 274.64–66

The Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market as described below, as the attributes of this product in Column 3 of the table above are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

Distribution conditions/restrictions

This part is required under section 994B(5)(c) of the Act.

Distribution Condition	Distribution Condition Rationale
There are no distribution conditions	Not applicable

Review triggers
This part is required under section 994B(5)(d) of the Act.
Material change to key attributes, fund investment objective and/or fees.
Material deviation from benchmark / objective over sustained period.
Key attributes have not performed as disclosed by a material degree and for a material period.

Review triggers
This part is required under section 994B(5)(d) of the Act.
Determination by the issuer of an ASIC reportable Significant Dealing
Material or unexpectedly high number of complaints (as defined in section 994A(1) of the Act) about the product or distribution of the product.
The use of Product Intervention Powers, regulator orders or directions that affects the product.

Mandatory review periods	
This part is required under section 994B(5)(e) and (f) of the Act.	
Review period	Maximum period for review
Initial review	1 year, 3 months
Subsequent review	3 years

Distributor reporting requirements		
This part is required under section 994B(5)(g) and (h) of the Act.		
Reporting requirement	Reporting period	Which distributors this requirement applies to
Complaints (as defined in section 994A(1) of the Act) relating to the product design, product availability and distribution. The distributor should provide all the content of the complaint, having regard to privacy.	Within 10 business days following end of calendar quarter	All distributors
Significant dealing outside of target market, under s994F(6) of the Act. See Definitions for further detail.	As soon as practicable but no later than 10 business days after distributor becomes aware of the significant dealing.	All distributors
To the extent a distributor is aware, dealings outside the target market, including reason why acquisition is outside of target market, and whether acquisition occurred under personal advice.	Within 10 business days following the end of calendar quarter.	All distributors

If practicable, distributors should adopt the FSC data standards for reports to the issuer. Distributors must report to InvestSMART by email to support@investsmart.com.au. This email address also provides contact details relating to this TMD for InvestSMART.

Definitions

Term	Definition
Consumer's investment objective	
Capital Growth	The consumer seeks to invest in a product designed to generate capital return. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product to reduce volatility and minimise loss in a market down-turn. The consumer prefers exposure to defensive assets (such as cash or fixed income securities) that are generally lower in risk and less volatile than growth investments.
Capital Guaranteed	The consumer seeks a guarantee or protection against capital loss whilst still seeking the potential for capital growth (typically gained through a derivative arrangement). The consumer would likely understand the complexities, conditions and risks that are associated with such products.
Income Distribution	The consumer seeks to invest in a product designed to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (typically, high dividend-yielding equities, fixed income securities and money market instruments).
Consumer's intended product use (% of Investable Assets)	
Solution/Standalone (75-100%)	The consumer intends to hold the investment as either a part or the majority (up to 100%) of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least High <i>portfolio diversification</i> (see definitions below).

Term	Definition
Core Component (25-75%)	The consumer intends to hold the investment as a major component, up to 75%, of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least Medium <i>portfolio diversification</i> (see definitions below).
Satellite (<25%)	The consumer intends to hold the investment as a smaller part of their total portfolio, as an indication it would be suitable for up to 25% of the total <i>investable assets</i> (see definition below). The consumer is likely to be comfortable with exposure to a product with Low <i>portfolio diversification</i> (see definitions below).
Investable Assets	Those assets that the investor has available for investment, excluding the family home.
Portfolio diversification (for completing the key product attribute section of consumer's intended product use)	
Low	Single asset class, single country, low or moderate holdings of securities - e.g. high conviction Aussie equities.
Medium	1-2 asset classes, single country, broad exposure within asset class, e.g. Aussie equities "All Ords".
High	Highly diversified across either asset classes, countries or investment managers, e.g. Australian multi-manager balanced fund or global multi-asset product (or global equities).
Consumer's intended investment timeframe	
Short (≤ 2 years)	The consumer has a short investment timeframe and may wish to redeem within two years.
Medium (> 2 years)	The consumer has a medium investment timeframe and is unlikely to redeem within two years.
Long (> 8 years)	The consumer has a long investment timeframe and is unlikely to redeem within eight years.
Consumer's Risk (ability to bear loss) and Return profile	
<p>Issuers should undertake a comprehensive risk assessment for each product. The FSC strongly recommends adoption of the Standard Risk Measure (<i>SRM</i>) to calculate the likely number of negative annual returns over a 20 year period, using the guidance and methodology outlined in the <i>Standard Risk Measure Guidance Paper For Trustees</i>. SRM is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. Issuers may wish to supplement the SRM methodology by also considering other risk factors. For example, some products may use leverage, derivatives, or short selling, may have liquidity or withdrawal limitations, or otherwise may have a complex structure or increased investment risks, which should be documented together with the SRM to substantiate the product risk rating.</p> <p>A consumer's desired product return profile would generally take into account the impact of fees, costs and taxes.</p>	
Low	The consumer is conservative or low risk in nature, seeks to minimise potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)) and is comfortable with a low target return profile. Consumer typically prefers defensive assets such as cash and fixed income.

Term	Definition
Medium	<p>The consumer is moderate or medium risk in nature, seeking to minimise potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)) and comfortable with a moderate target return profile.</p> <p>Consumer typically prefers a balance of growth assets such as shares, property and alternative assets and defensive assets such as cash and fixed income.</p>
High	<p>The consumer is higher risk in nature and can accept higher potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 6)) in order to target a higher target return profile.</p> <p>Consumer typically prefers predominantly growth assets such as shares, property and alternative assets with only a smaller or moderate holding in defensive assets such as cash and fixed income.</p>
Very high	<p>The consumer has a more aggressive or very high risk appetite, seeks to maximise returns and can accept higher potential losses (e.g. has the ability to bear 6 or more negative returns over a 20 year period (SRM 7) and possibly other risk factors, such as leverage).</p> <p>Consumer typically prefers growth assets such as shares, property and alternative assets.</p>
Consumer's need to withdraw money	
<p>Issuers should consider in the first instance the redemption request frequency under ordinary circumstances. However, the redemption request frequency is not the only consideration when determining the ability to meet the investor's requirement to access capital. To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be taken into consideration in completing this section.</p>	
Daily/Weekly/Monthly/Quarterly/Annually or longer	<p>The consumer seeks to invest in a product which permits redemption requests at this frequency under ordinary circumstances and the issuer is typically able to meet that request within a reasonable period.</p>
Consumer's Other requirements	
Individual tax management of investments	<p>The customer is seeking a product that provides the ability to actively manage the consumer's tax position in the recommendations which are made to them</p>
Visibility / transparency of portfolio holdings	<p>The consumer is seeking a product that provides a clear understanding of the constituents in their portfolio.</p>
Ability to customise portfolio or accommodate other holdings	<p>The consumer requires the ability to specifically include, exclude or manage specific investments or classes of investment for particular reasons, such as ESG considerations, or because they have existing holdings which need to be accommodated in portfolio design.</p>

Term	Definition
Ability to include <i>in specie</i> transfer of existing investments	The consumer has existing holdings which they expect to be incorporated into their portfolio and where ownership is to carry on, subject to subsequent portfolio management considerations. This may be for tax, transaction cost or other reasons.
Distributor Reporting	
Significant dealings	<p>Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is ‘significant’ and distributors have discretion to apply its ordinary meaning.</p> <p>The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.</p> <p>Dealings outside this TMD may be significant because:</p> <ul style="list-style-type: none"> • they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or • they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer). <p>In each case, the distributor should have regard to:</p> <ul style="list-style-type: none"> • the nature and risk profile of the product (which may be indicated by the product’s risk rating or withdrawal timeframes), • the actual or potential harm to a consumer (which may be indicated by the value of the consumer’s investment, their intended product use or their ability to bear loss), and • the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red or amber ratings attributed to the consumer). <p>Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:</p> <ul style="list-style-type: none"> • it constitutes more than half of the distributor’s total retail product distribution conduct in relation to the product over the reporting period, • the consumer’s intended product use is <i>Solution / Standalone</i>, or • the consumer’s intended product use is <i>Core component</i> and the consumer’s risk (ability to bear loss) and return profile is <i>Low</i>.
